Personal Profile Statement

Currently pursuing Software Engineering at the University of the South Pacific and exploring opportunities to help grow in software or web development field. Solid with the following programming languages: C++, HTML, and CSS and ready to take them into a working environment. Proficiency in communication skills and analytical approaches as well as a team player. I'm an enthusiast, sharp problems solver, eager to learn and work on challenging tech projects.

Areas of Strength

- Basic Knowledge in a handful programming languages such as, C++, HTML, CSS, Java, SQL. (Learning in Process)
- Tools: Visual Studio Code, Microsoft Office, Microsoft Excel, Canva
- Operating Systems: Windows
- Communication: Strong written and verbal communication skills
- Teamwork: Experienced working collaboratively in group projects
- Problem Solving: Analytical and solution-focused approach
- Web Development: Basic front-end web page design and layout skills
- Project Management: Basic understanding of managing projects and handling deliverables.
- User Acceptance Testing: Strong skills in technical system testing to find faults, bugs and issues for further improvement and critical analysis.

Education

2010 – 2018 - Naidovi Primary School

- Participated in a district Math quiz

2019 - Cuvu College High School

- Attended only Year 9

2020 – 2023 - Sigatoka Methodist College

- Participated in a Titration Competition at USP in Year 12
- Graduated High School with GPA 3.5+ (329/400)

University Education – Bachelor of Software Engineering

2024– 2026 University of the South Pacific (Academic Achievement Breakdown)

- Year 1,Year 2,Year 3 – GPA Above 3.0

Achievements

- Currently Pursuing Bachelor of Software Engineering at The University of the South Pacific (Expected Graduation: 2027)
- Completion of CS111/CS112 C++ Certification by University of the South Pacific
- Completion of CS214 Java Certification by University of the South Pacific
- Completion of 2nd Year Bachelor of Software Engineering
- 6 Months Project Intern Experience

Employment - Spirit of Endeavour May 2025 till November 2025 | Position – Project Intern

- Participated in numerous stakeholder meetings on important milestones.
- Assisted with User Acceptance Testing hands-on and coordinated with administrative task.

- Used Analytical Skills to study project's purpose and system that was built as part of the project.
- Provided support to administrative tasks throughout the internship period.
- Drafted social media write-ups and worked on giving stakeholders weekly news through intranet.
- Provided support in risk management activities.

Hobbies & Interests:

My interests lie in the Artificial intelligence field. As AI advances and progresses, it intrigues me to understand what are the outcomes that the increased usage of artificial intelligence brings to the global nations and how it can be effectively used to assist people in several ways. It is more commonly used in people's day-to-day lives to assist in simple tasks whereby in some cases AI is used for more complex tasks such as writing codes, essays and integrating itself into a completely different service.

My hobbies involve indulging in mobile games and occasionally solving puzzles such as a rubik's cube which is a fun puzzle that can be used to relieve stress.
